Corporate Pharmacy Services (CPS) is a national Workers' Compensation Pharmacy Benefits Manager (PBM) delivering the lowest cost in prescription drugs via its aggressive MAC pricing on retail prescriptions and industry's only mail order cost plus pricing model. Cost are continually held in check using a myriad of reports along with an evidence based pharmacy intervention program that currently has a greater than 400% return on investment. Our proprietary Blue Diamond software allows adjusters and nurse case managers to literally manage their pharmacy program from their desktop. These benefits are only superseded by CPS' dedication to impeccable customer service that has led to a 99% client retention rate since our inception in 1990.
